PROFESSIONAL SUMMARY

Detail-driven **Full Stack Developer** and **B.Sc. Information Technology** graduate equipped with practical internship experience architecting responsive web applications with **React.js, Node.js, Express.js, Flask**, and **MySQL/Supabase**. Specialized in building end-to-end solutions featuring automated resume parsing algorithms, ATS keyword scoring, role-matching systems, and secure RESTful APIs. Possesses strong analytical problem-solving abilities, disciplined version control workflows, and a commitment to high-performance, maintainable code.

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript (ES6+), SQL
Frontend Tech:	React.js, HTML5, CSS3, Responsive Design, State Management
Backend & Frameworks:	Node.js, Express.js, Python Flask, RESTful APIs, Middleware Architecture
Databases & Storage:	MySQL, PostgreSQL (Supabase), SQL Query Optimization, Schema Design **Core**
Concepts & Tools:	Data Structures & Algorithms (DSA), OOP, Git, GitHub, VS Code, Postman

FEATURED PROJECTS

ResumeForge Pro — Full-Stack ATS Resume Builder

React.js, Node.js, Express, Supabase

Source Repository: github.com/afsalahamed444-design/ResumeForge-Pro

- Architected a full-stack automated resume generation engine featuring 5 customizable templates with real-time editing and live document export.
- Engineered a client-side **JavaScript ATS scoring parser** that analyzes resume content against target job descriptions, computes match percentages, and returns structured optimization suggestions.
- Built scalable **Express.js REST APIs** integrated with **Supabase** for secure document persistence, user authentication, and high-speed retrieval.
- Maintained 1 00% responsive cross-device layout utilizing clean modular CSS and component-driven React architecture.

AI Career Roadmap Platform — Intelligent Job & Skill Matching

Node.js, Express, React, REST APIs

Source Repository: github.com/afsalahamed444-design/AI-Career-Roadmap

- Engineered a reactive web platform that ingests user resumes and provides dynamic skill gap analysis, personalized job roles, and curated learning roadmaps.
- Constructed robust **Node.js/Express** micro-endpoints handling payload parsing, token-based session auth, and keyword classification.
- Implemented stateful user dashboard with persistent tracking and executed disciplined **Git/GitHub** feature-branch workflows.

WORK EXPERIENCE

Full Stack Developer Intern — WHY Global Services

Chennai | Feb 2026 – Mar 2026

- Completed intensive enterprise full-stack development, delivering full lifecycle modules across **HTML5, CSS3, JavaScript, Node.js, and Express**.
- Developed and benchmarked **RESTful API endpoints**, optimizing client-server data flow and database read/write throughput.
- Collaborated closely with senior software engineers in agile sprints to architect two independent, production-grade web applications on schedule.

Web Development Intern — Hywin Engineering & Co

Chennai | Jun 2026

- Designed and tested lightweight backend routing and dynamic server-rendered web portals utilizing **Python and Flask**.
- Conducted functional debugging and code reviews, identifying and fixing UI rendering bottlenecks to improve overall page response time.

EDUCATION

Bachelor of Science (B.Sc.) in Information Technology

The New College, Chennai

Year of Graduation: 2026

Key Focus: Data Structures, Web Systems, OOP, Database Engineering

CERTIFICATIONS & ACCREDITATIONS

- **Full Stack Development** — WHY Global Services (2026)
- **Web Development Certification** — Hywin Engineering & Co (2026)
- **SQL (Basic) Certified** — HackerRank (2026)
